

The Immortal Vampire

Immortal Soul Line I
Nature's Superlative Energy Transformer

A Sensual World of Scarlet Passions

Patterns of darkness too often mar the exquisite features of those who carry the lines of the Vampire in their genetic structure. This lineage originates from an ancient race of immortal beings who absorb and transform energy throughout the universe. Compelling legends of vampires abound in our folklore, and many myths flourish today in our current media. Unfortunately, much of this lore focuses on the dark side of vampirism, and the light powers are rarely revealed.

Unforgettable images of nocturnal spaces, brutal violence, ravenous blood feeding, super-powerful strength, heightened senses, uncanny speed, and sometimes even flight are fantasy-based aspects that cloud our vision when it comes to documenting and understanding the actual abilities shared by the Vampire Souls among us.

The physical energy sphere of the Vampire correlates with the living vortex referred to as the root chakra. This is considered the first chakra and lies in the seat of the body. It's associated with the color red, and many a vampire will tell you how strongly they're drawn to the deep shades of red, scarlet, burgundy, and other tantalizing shades of wine.

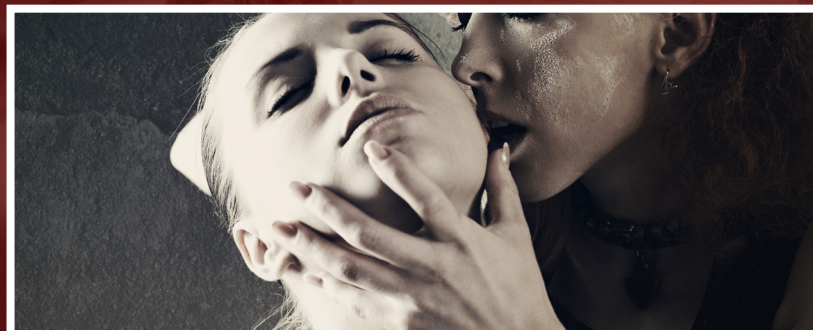

Truthfully, most vampires are attracted to nighttime activities. Most are also above average in strength, at least as far as endurance goes, since they're able to absorb strength from others as needed. Some vampires are unaware of their powers; but if once shown the truth, they tend to recognize themselves as carrying these Soul Lines.

Do you consider yourself enormously sensual? Meaning that your five senses are the outlets to your soul. Do you thrive on the pleasures of touch, sight, sound, taste and smell? While all Soul Lines have healthy sexual appetites, the Vampire often focuses on the mesmerizing gratification that can only be achieved through highly-charged sexual exchanges and erogenous life-force feedings.

Night-time, moonlight, feasts and festivals, romantic sexualized relationships, bursts of energy, quick-changing moods, above average endurance, natural grace and charisma. Do these words speak to you? If so, you may be carrying the seeds of Immortal Vampire Soul Lines. With the right information, you'll fulfill your spiritual destiny through the development of your innate powers to drink in and transform the energy flowing in the life-force of all living creatures!

The Immortal Vampire Is My Primary Soul Line!
